

## CURTAIN TRACK MACHINES:

Many different models of electric curtain track machines are available for a wide variety of draw and lift applications. Economical versions with manual stop-start and automatic control variations with adjustable limit switches may be ordered. Curtain machines may be mounted on the floor at the end of the track, on a wall, or in another room. Special versions are available to mount on the track for curtains which fly as well as traverse. The proper choice of both the type and size of curtain machines is determined by the type of track to be used, whether the track is straight or curved, the weight of the curtains, and the number of remote control stations required.

## LIGHT DUTY CURTAIN MACHINES:

Are furnished with a single groove drive wheel for use with small curtains. Are also available with sprocket drive wheel for use with roller chain. All machines include a remote control switch.

Catalog No.	Description	PRICE
#579	Compact size, variable speed motor. Includes track mounted magnetic limit switches for precise operation. Can move curtains up to 150 lbs (depending on track used) at speeds from 1 to 40 fpm. Size 4.5" w x 5.5" d x 7" h.....	\$ 786.98
#872	1/30hp, Automatic, drive wheel, single control location only. ....	\$ 763.50
#872MCS	1/30hp, Automatic, drive wheel, multiple controls possible. ....	\$ 946.51
#1002	1/8hp, Automatic, drive wheel, single control location only. ....	\$ 1369.11
#1002MCS	1/8hp, Automatic, drive wheel, multiple controls possible. ....	\$ 1531.20
#1002VED	1/8hp, Automatic, grooved cable drum for 17' cable travel.....	\$ 1861.98
#1002VEA	1/8hp, Automatic, grooved cable drum for up to 30' cable travel. Specify distance.....	\$ 2173.23
#1003MCS	1/8hp, For masking curtains, with sprocket wheel & brake.....	\$ 1749.59

## TRACK-END ( IN-LINE) MOUNTED MACHINES:

Designed to attach to the end of a 170 or 280 series track. Include a dual N-groove drive wheel and track mounted limit switches. Motor is 1/2 hp 120 vac with 24 vac control. Cable speed is 90 ft/min. Can be installed onto many existing tracks. Eliminates bulky floor mounted machines and routing cables from the track to the machine.

#2917	For use with #170 series tracks. ....	\$ 2336.94
#2928	For use with #280 series tracks. ....	\$ 2388.40

## AUTOMATIC DRAW MACHINES:

Include a grooved cable drum which provides positive and accurate movement of the curtain. Models with device to maintain tension on cable are required for curved or long tracks. Internal limit switches and a momentary remote control switch provide full open and closed automatic operation. Intermediate pre-set stops are an option.

Catalog No.	Description	PRICE
#934	1/4hp with grooved drum. ....	\$ 1968.03
#1454	1/3hp, with grooved drum. ....	\$ 2216.71
#2904	1/2hp, with grooved drum. ....	\$ 2399.36
#2905	1/2hp with cable tension device.....	\$ 3021.18
#6505	3/4hp with cable tension device.....	\$ 3132.81
#7005	1hp with cable tension device.....	\$ 3319.84

## VARIABLE SPEED AUTOMATIC MACHINES:

Allow variable speed from 0 to 3 feet/second of curtain separation (0-86 feet/second cable speed). Include programable frequency drives which can set start acceleration and stop deceleration speed ramps, as well as run speed.

Catalog No.	Description	PRICE
#2904-TV	1/2hp, Variable speed.....	\$ 3860.30
#6504-TV	3/4hp, Variable speed.....	\$ 3889.63

## AUTOMATIC LIFT MACHINES:

Used to raise and lower curtains. Include internal limit switches and un-grooved cable drum. Special versions with multiple drums are available for contour curtains.

#963	1/4hp, 100 pound capacity.....	\$ 1429.24
#1456	1/3hp, 300 pound capacity.....	\$ 2140.61
#2906	1/2hp, 400 pound capacity.....	\$ 2347.60
#6506	3/4hp, 600 pound capacity.....	\$ 2470.90

Larger capacity models are available.

## OPTIONS:

Machines can be furnished with magnetic brakes, track mounted limit switches, multiple automatic stop positions, low voltage remote control, sprocket wheels for chain drive, metal enclosures, wall mounting brackets, and cable tension devices.

## WIRE CENTER CABLE:

Curtain machines use special operating cables which have a flexible wire rope center covered with an outer woven fabric braid or extruded plastic coating. Specific model cables with sizes from 1/8" to 3/8" outer diameter are available to fit specific curtain machines.
