Outdoor-PAR64

Outdoor-PAR64 with 8" combo snoot/color frame holder

Star*PAR:

This fixture is an alternate to conventional PAR56 and PAR64 fixtures. A rugged die-cast aluminum housing contains a separate reflector, medium 2-pin socket, and a changeable, rotatable front glass lens. The fixture can be quickly changed from a spot to medium to flood by inserting one of the 5 inexpensive front lenses. Instead of throwing away the entire PAR lamp when it burns out, just the compact lamp is discarded. This fixture is designed to use the efficient compact filament tungsten halogen lamps such as the 575 watt GLC or GLA series, while producing light levels similar to higher wattage conventional PAR lamps. The front accessory holder has 2 slots to handle a color frame and a barndoor, and a self-closing, locking retaining latch for safety. A rear-mounted handle serves as cord wrap and focusing aid. Includes a set of 4 lenses, 10"x10" color frame, safety cable, and 3' leads. Available in black, white, and custom colors for architectural applications. UL, CUL, and CE listed for up to 575 watts and indoor use. Not intended for use outdoors. For exterior or wet use see the Outdoor-PAR64 and OD-600-A.

- SP-A Star*PAR, black color, complete with very narrow, narrow, medium, and wide lenses \$ 195.00
- SP-A-White Star*PAR white color with 4 lenses \$ 232.50

Outdoor-PAR64:

This fixture is designed for portable or permanent outdoor installations in wet applications using PAR64 sealed beam lamps. Cast aluminum housing with a stainless steel lens holder have gaskets to insure a water-tight seal. On the rear is an aluminum handle to aid in focusing. Wiring leads are 24' long of sunlight resistant, waterproof high-temp cable. Includes mogul end prong lamp socket inside and a 36" safety cable. Lamp, color frame, and plug are optional. Optional snoot/color frame holder is available in 8" or 1" length (for use with wide lamps) to control spill light, and to hold an included 10" x 10" color frame or other accessory. UL and CUL listed for 1000 watts and wet locations. Not suitable for underwater use. Available in custom colors for architectural use.
