

PHOTOGRAPHIC BACKDROP STANDS:

Lightweight telescoping stands with crossbars can hold rolls of seamless background paper, painted backdrops, or curtains. May also be used for portable video "keying" backdrops for location interviews. Curtains are available separately.

DL/BG-3CB STAND SET:

Deluxe set includes two stands with heavy duty, braced tripod bases, and three telescoping 3-section crossbars. Silver colored aluminum construction. Included in the set are two pair of #BG-A clamps which permit locating two of the crossbars at any location on the 7/8" diameter upper vertical poles. Safe-lock clutch collars on each stand allow infinite adjustment of the height, and provide secure locking. Height is adjustable from 54" to 98". Width is adjustable from 56" to 151". Weight of set is 15 lbs.

DL/BG-1CB Stand Set:

Same as above, except includes two stands and only one crossbar. Additional crossbars may be added later. Weight is 11 lbs.

BGS STAND SET:

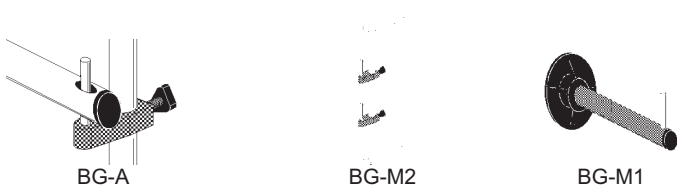

Economy stand set includes two stands with tripod bases and one telescoping 2-section aluminum crossbar. Stands constructed of chrome finish, square steel tubing uprights, and black finish steel legs. Push-button lock on each stand holds uprights at preset heights. Height is adjustable from 51" to 100". Width is adjustable from 63" to 116". Weight of set is 12 pounds.

#3-CB	Crossbar, 3 sections, adjusts from 56" to 156" ..	\$ 47.00

DRAPERY SUPPORT SYSTEM:

Consists of vertical and horizontal poles of strong aluminum tubing and flat bases of steel plate. Applications include scenic backdrops, masking curtains for temporary stages, fashion shows, display booths. Lightweight and portable. Uprights screw into the bases for a secure fit. Flat bases easily stack for storage. Top of each upright has four vertical slots to accept the hook ends of the horizontal poles. An additional set of slots is located at a height of three feet for railings. Custom sizes and curtains are available.

TELESCOPING UPRIGHTS:

A set screw near the top of the outer tube permits setting any height within the range of the telescoping uprights. Some models include a spring-held button that locks into holes in the outer tube to quickly set the upright to preset heights. Actual height of uprights is slightly higher than shown.

Catalog No.	Description	Price
#EXU3	Upright, 3', fixed height for railings	\$
#EXU6	Upright, 6', fixed height.....	\$
#EXU6T	Upright, 6' to 8', no fixed stops	\$
