

**“STUDENT PROOF\*” COMPACT DIMMER SYSTEMS:**

Scenemaster 1 and 6 are self contained controller and dimmer pack in a desktop case. Excellent choice for drama classes, clubs, and small studio lighting. Each has six 1000 watt dimmers, bump/flash buttons, and dual U-ground outlets per dimmer. Two recessed plugs are provided on the back of the case for input power using standard extension cords (not included). Requires connection to two separately breakered wall receptacles (each 20a 120v) for full power. May be operated at reduced capacity from one wall receptacle. Two Scenemaster 6 units may be connected together using an optional #CM-MS master/slave cable. [\* Well, nearly almost.]

**SUBLIME TECHMASTER CONSOLES:**

These models include 24 (or more) programable submaster faders and a “virtual” memory to hold a second scene while operating in single scene mode. Modular design permits adding additional submaster panels and two/scene fader panels to assemble larger consoles.

**SHOE BOX DIMMER PACK:**

Designed for hanging on a pipe or truss near the lights it controls, or use as a free standing, self contained dimmer system for small applications. Has a mounting yoke for use with an optional lighting clamp. A recessed male plug accepts a standard AC extension cable (not included) for input power. Accepts both DMX-512 and 0-10vdc control signals. Includes switches to set starting channel number, DMX signal terminate, non-dim, and full on. Create a flexible, portable dimmer system by combining several dimmer packs with a Techmaster, Sublime, or IQ-192 console. Approximate size is 7" x 5" x 4" and weighs 8 lbs. ETL listed. Custom models with twist-lock connectors or for 220 vac are available.
