

CURTAIN TRACK CORDS:

Cotton sash cords have been replaced by double-braided polyester cords with a reinforced core. This product is strong, stretch-resistant, and very suitable for hand-operated curtain tracks. Special cords with wire cable cores and plastic or cotton covers are available for motorized tracks. #A3529 for #350 and #340 motorized Curvit-Sure tracks. #A5029 for #500 motorized tracks. **TIE LINE** is an inexpensive small cotton cord with an unglazed matte black soft finish for attaching curtains to battens. Not intended for supporting scenery or lights.

Cat. No.	Size	Description	Spool Size	Price/ft. Cut Lengths	Price/ft. 200' +	Price/Spool
#Tie-3000	1/8" (#4)	Matte black, soft cotton tie line, not coated	3000'	\$.06		\$ 93.00

Double Braid with Reinforced Core

Solid Braid with Reinforced Core

Solid Braid with Wire Cable Core

WIRE ROPE (AIRCRAFT CABLE):

Multi-purpose item for supporting and lifting scenery, lighting, speaker cabinets, and curtains. Wire rope having 7x7 type stranding is used for static (non-moving) applications such as guide lines or dead-hung objects. The more flexible 7x19 type stranding is best for cables which move over pulleys. The breaking strengths of wire rope are given for reference. Actual working loads should be approximately 12% to achieve an 8:1 safety factor.

Size	Type	Breaking Strength	Working Load	Price/ft. Cut Lengths	Price 250'	Price 500'	Price 1000'
1/16"	7 x 7	480#	60#	\$.08		\$ 24.15	
1/8"	7 x 19	2000#	250#	\$.15	\$ 30.75		
3/16"	7 x 19	4200#	525#	\$.19			
1/4"	7 x 19	7000#	875#	\$.25			
5/16"	7 x 19	9800#	1225#	\$.50			
3/8"	7 x 19	14400#	1800#	\$.75

Stage-Set-X Rope

Multiline-II Rope

RIGGING ROPES:

Stage-Set-X and **Multiline-II** are replacements for manila rope. Both provide longer life and eliminate the problems of splinters. They will not rot, or change length with changes in temperature and humidity as does manila rope. **Stage-Set-X** is a multi-layer polyester braided construction over a core of parallel strands. It does not kink, and remains firm and round after passing over blocks and thru rope locks. **Multiline-II** is a 3 strand rope of polyester fibers and is similar in appearance and handling to manila rope. Standard color is white, but black and other colors can be provided. Additional discounts for large orders.

Cat. No.	Size	Description	Working Load	Price/ft. Cut Lengths	Price/ft. 200' +
#028-625X	5/8"	Stage-Set-X, white color	1800		
#028-750X	3/4"	Stage-Set-X, white color	2200		
#028-500M	1/2"	Multiline-II, white color	725		
#028-625M	5/8"	Multiline-II, white color	1025		
#028-750M	3/4"	Multiline-II, white color	1350		

Proof Coil Chain

Double Loop Wire Chain

Jack Chain

CHAINS:

Welded link **Proof Coil** chain is economical for hanging scenery, lighting and curtains at a fixed height. **Double Loop** twisted wire chain is suitable for supporting border and leg curtains and tracks. **Jack** chain is used as a flexible weight in the bottoms of curtains, scrims, and scenic drops, and as short lengths on curtain carriers to adjust the height of curtains. *Never use jack chain to support lights or tracks!* Chains have standard zinc plated finish, or galvanized finish for maximum rust prevention.
